The video below spells out how the new non-production economy functions -- what becomes painfully evident as the video progresses is that this model is entirely unsustainable and self-destructive. What is worse is that this fabricated money is utilised to enslave the masses that are forced to toil -- real work production -- to service fabricated debts.

The Global Federal Reserve system is simply a means to inflict a debt burden on the public and on nations.

The greater folly however, is not the absurdity of the system, it is the blind acceptance of this ludicrous con by the public. We present it here not for the mindless, useless, enslaved masses but for those that cherish FREEDOM above all else.

We have included the PDF document of the original Reserve Bank publication, "Modern Money Mechanics."
