

Solar Activity Frenetic over past Decade

by grae Tuesday, Sep 4 2012, 12:08pm

international / prose / post

And what else have we witnessed over the past decade, legalised torture, draconian new laws, permanent war, extra-judicial assassinations, civilian holocausts, indefinite detention without charge, runaway climate change and the deplorable list goes on?

Massive 'light bulb' solar flare

If we care to review past solar activity the connection with turmoil on the earth is easily made; it appears that agitation/turmoil on one solar body affects other solar bodies including the solar sphere itself. It is known by astro-physicists that (all) bodies in our solar system are connected energetically and are therefore mutually affective although it is thought those energies are negligible.

The condition on earth at this time could hardly be described as peaceful with criminals in control of most governments hell bent on waging war, depleting fish and food stocks, polluting arable land and water sources -- human activities on the terrestrial sphere are best described as insane, pure and simple. No amount of media spin or distraction could veil the MAN MADE lunacy and horrors of the new century.

And what is OUR Sun doing while humanity pursues its insane course? Well, check the vids (below) for yourself and realise that these solar flares return huge amounts of negative plasma energy to the earth.

As a consequence EXPECT MORE destructive tectonic activity until such time as humanity learns that everything is alive and is mutually a/effective; yes, the sun is alive, or put another way, there is 'life' on the sun as there is on every planet in our living solar system/UNIVERSE -- though clearly that life bears no relation to this earthly dimension.

I leave you with some readings from extraordinary psychic, Edgar Cayce, regarding solar flares and sun spots -- a very unusual but interesting perspective:

"As what [how] does thy soul appear? A spot, a blot upon the sun? Or as that which giveth light unto those who sit in darkness, to those who cry aloud for hope?"

"Tendencies in the hearts and souls of men are such that these [earth changes] may be

brought about.... As ye do it unto thy fellow man, ye do it to thyself unto God."

"The more ye become aware of thy relationships to the universe and those influences that control same, the greater thy ability to help...even as to the sun which reflects those turmoils that arise in thee; even as the earthquake, even as wars and hates, even as the influences in thy life day to day.

Then, what are the sun spots? A natural consequence of that turmoil which the sons of God in the earth reflect upon same."

Very quaint but is it true? Determine that for yourself. The plasma energies referred to also affect human beings. Heightened levels of sensitivity are now common. For instance, a psychic pall has slowly descended on the major coastal Australian city in which I reside. I thought it odd so arranged to venture into other regions some distance away, coastal and inland. I was astounded to experience profound differences in the vibratory rate of various locations and regions; in some instances the contrast was akin to emerging from a stale dungeon into the pure, fresh mountain air and sunshine of a clear unpolluted sunny day. My beautiful city, however, is steadily succumbing to the psychic fog/pall that is enveloping it, so I'll be off shortly.

Use YOUR innate senses to determine which course YOU will take, HARMONY or the current destructive madness our leaders have prescribed.

Positive change is always an option though energies already released must complete their cycle and fulfil their expression.

Peace.
