

Oz Jihadists' Passports Cancelled

by staff report via hasan - ABC - Oz Friday, Dec 20 2013, 9:48pm

international / prose / post

One wonders at times what Oz 'intelligence' agencies do besides run errands for the NSA and Washington (Indonesian phone hacking) and try to find their dicks to have a piss -- there is such a thing as local security, lackey dunces. However, with a record over the past few decades of totally incompetent governments of both stripe, it is little wonder that (former) chiefs of AFP are drunks and ASIO is too busy navel gazing and serving the US to NOTICE that Oz underground Jihadist groups have been thriving.

The largest contingent of foreign volunteers to fight (and train in terrorist warfare) for the rebels in Syria is from Australia -- approx 250-300 morons! Syria provides the perfect training ground for violent Jihadists as monitoring movements is almost impossible.

In a clearly panicked reaction to this 'NEW' Australian terrorist threat, which should have been nipped in the bud well before these morons left the country, ASIO has cancelled the passports of these fanatics in order to prevent them returning, fully trained in terrorist warfare, to Oz.

Well, better late than never but the level of competence of Oz regulatory forces and agencies is woeful -- I say this from personal (recorded) experience; never has anyone witnessed a more naive bunch of boy scout bureaucratic mentalities than in Oz intel agencies -- the one exception is sigs.

Every effort should be made to block the return of these moron fanatics and ferret out the local networks that have instilled fundamentalist ideologies in impressionable inbred Muslim youths. The only equivalent comparison I could make with these local groups would be the fundamentalist Baptist Evangelical morons of the USA; in fact it is the USA that utilises the services of Muslim Jihadists to fight its proxy wars on the ground -- they have much in common, particularly IQ and violence levels.

Now get to work Oz dunce agencies; get your hands dirty, INFILTRATE and neutralise these local networks before it's too late, or must you be taught operational basics again?

Story from the Oz ABC follows:

ASIO cancels passports of Muslim men 'over jihad war fears'

A Sydney lawyer says she is prepared to fight in the High Court over a decision by ASIO to cancel the passports of 20 Muslim men.

The SMH reported this morning that ASIO had cancelled the passports over fears the men, who are from Sydney, would travel overseas to engage in "politically motivated violence".

The move comes after the AFP last week charged two men with allegedly attempting to join the conflict in Syria.

At least four Australians are known to have been killed in the Syria conflict, and intelligence agencies are thought to be tracking about 100 Australians active in the fighting.

Lawyer Zali Burrows says she has been approached by 15 of the men whose passports have been cancelled.

Ms Burrows says the men have received letters requiring them to surrender their passports and they have been told they are an adverse security risk.

She says the men are worried and she is not aware of any of them wanting join the fighting in Syria.

"Basically they're suspected of being terrorists or wanting to go to overseas and participate in jihad war, or whatever other reasons," she said.

"Some of these guys were just young guys wanting to go on holiday to Bali, they even packed their board shorts. Others wanted to go and visit a sick relative."

One of the men, 19-year-old Abu Bakr, told Fairfax he had been targeted for speaking out about violence against Muslims.

"It is a 10-page letter saying I had a jihadi mentality ... I have never been approached by ASIO to talk about this," he said.

"We have been treated unjustly. My record is clean, shiny gold. I am not a criminal."

ASIO says it can cancel passports on security grounds and that withholding passports is an important means of preventing Australians from acting against national security.
