This is a gem of a revelation because it's totally accurate and highlights the utter absurdity/insanity of the U.S. administration. This 'philosophy' applies across the board with the techno-weapons industrial complex.

Some accurate pre-Snowden background information that received little publicity at the time. We should all ask ourselves about the CORPORATE media saturation of the Snowden discourse, which distracts from the illegalities of these government and agency activities. It's not about Snowden, it's about criminal activity in high places.
