

The US and its Muslim Terrorist Puppets -- a long history

The recent exposure of America's tight working relationship with Saudi-Israeli backed Sunni terrorists is no surprise as that information has been freely available on the public record for decades.

As a result of the failed Syrian 'rebel' campaign it is now widely known that the US and its Saudi and Israeli partners have utilised terrorists to fight proxy ground wars in the Balkans, Middle East, Central Asia and North Africa, however, it should not be forgotten that these relationships did not appear out of a vacuum, they have, like everything else, a HISTORY, so I will go out on a limb and state that US objectives are multi-layered, if they lose the initial direct intervention war the US is happy to create chaos and DESTABILISE nations it targets -- thanks to naive and loquacious Gen. Wesley Clark, the world is now aware of America's five year plan to illegally seize control of seven nations, ending with Syria and Iran!

Do not imagine the US has failed in Syria, the main objective is DESTABILISATION, FACILITATING takeover by Washington compliant gangster government; in that regard Syria is well on its way despite Russia's intervention in support of the Assad regime. Over seven million displaced persons and over 100K dead indicate 'success' -- are Iraq, Afghanistan, Libya, Egypt, Yemen, Sudan etc, stable societies? Terror rages in all and yet the US/NATO and allies are able to plunder valuable resources without too much difficulty, factions are too busy fighting each other to come together and fight a common enemy.

The included picture shows a CIA trained, uniformed Osama Bin Laden hosting American advisor Zbigniew Brzezinski in **1981**. The close relationship of the Bush and Bin Laden families is also widely known yet it has taken decades for a few simple facts to penetrate thick American skulls.

Imagine what would happen if the truth of 9/11 became widely known! It has been a government orchestrated conspiracy from day one; 9/11 was a LIE, anthrax letters a LIE, Iraq WMDs a lie, 'humanitarian interventions' are pretexts to invade and steal oil, regime change remains a crime -- no nation is legitimately able to decide who should lead another nation. In fact, since the turn of the

new century every successive US administration has stated what amounts to so much hogwash and it is tolerated!

In conclusion, do not forget that Obama really is the leader of the nation, Kissinger told him so, and his prepared orders must be obeyed -- forget about reality, believe the mass media and watch Miley Cyrus scratching her cunt on TV. In the meantime US created and supported terrorists are plying their murderous trade in strategic hot-spots around the world.

Notwithstanding the above, I have never forgotten the smiling words of Ho Chi Minh in an address to America during the Indo-Chinese war -- "**you will never succeed!**" The same applies today, the world knows the US just doesn't have what it takes, it can never go the distance. It is already bankrupt and uses the excuse of Quantitative Easing to temporarily prop up its DEAD economy; \$17+ trillion debt means the dollar is actually worthless, it is printed like 'toilet paper' on demand -- America, a FOOL'S PARADISE!
