

It's Bloody Obvious but Hidden from American Eyes!

by baz *Saturday, Jan 18 2014, 12:48am*

international / prose / post

An old friend used to repeat a slogan, "you can hit me but don't shit me," which made no sense to me at the time -- put it down to youthful naivety. It often raised a laugh in unfamiliar company but I still didn't get it! Then the most dreaded thought began to plague my mind, I may really be an American not a rough, penal colony-raised, aware Aussie.

The primary news on the US alternative media is Snowden and more Snowden and what can 'we' do about illegal NSA Global surveillance? Surely, the answer is obvious, INTRUSIVE, UNWARRANTED, GLOBAL SPYING ON EVERYONE IS FUCKIN' ILLEGAL IN EVERY COUNTRY IN THE WORLD! If independent nations took legal action in the appropriate, existing international courts it would constitute the largest LEGAL litigation in GLOBAL history; AND since we live in a globalist society then the solution should always be globalist not local!

So who or what determines whether action should be taken or whether heinous and other obvious crimes are tolerated? Of course, the moronic masses actually determine the direction of any nation as they have the authority by virtue of Democratic prerogatives and Rights or by sheer force of numbers.

So we are led to the next obvious reality, the moronic American masses have not flinched over the past decade of unbridled criminal activity from government and agencies, even when confronted with GENITAL GROPING by government officials/perverts at US airports! This social reality led puppet-in-chief, Obama, to OPENLY mock and crack jokes about genital groping and the utter uselessness and SUBSERVIENCE (implied) of the now confirmed spineless, SLAVE population.

Now, another obvious reality goes unnoticed by the masses but not by criminal ruling elites, and that is; returned veterans pose the greatest risk to the illegitimate rule by unrepresentative minorities simply because they are acutely AWARE of the TRUTH of America's civilian killing CRIMINAL wars of resource appropriation AND are superbly trained to remedy the situation by stealthy targeted assassinations! It would be a duck shoot for any veteran. Remember men, you have sworn allegiance to your nation, the Constitution and people, NOT to the criminals in Wall St and Washington!

Solutions to America's and the global economic dilemma are simple and bloody obvious, what is lacking of course is not 'savoir faire' but the Will to Power and JUSTICE.

If the population was truly offended by the NSA or the clearly criminal government in Washington it would surely remove them from office and trounce the illegal activities of government agencies.

Now, it is ENTIRELY appropriate to introduce a hard reality missing from the debate and that is of what USE to American society has NSA surveillance been to date?

The war on Drugs is a lost pathetic joke yet the NSA boasts that it is aware of all the digital communications on the planet; organised crime has never had it better, its ballooning profits are now counted in the hundreds of TRILLIONS internationally. Terrorist activity has expanded because

the USA requires its CIA trained proxy armies to fight its dirty wars on the ground while it is LOSING control of these fanatic, maniacal, mass murderers -- there will be hell to pay on the home front, rest assured of that future reality.

The entire tragic charade amounts to a pathetic joke on the American people -- 'home of the who, land of the what?' Give me a break!

Fair funkin' dinkum, I have never felt better to be a clear thinking Aussie rough; Americans are CLEARLY incapable of adding 2 +2 or seeing the nose on their stupid, IGNORANT faces!

The score so far is NSA, Zero - Criminals, trillions and counting!

In conclusion I would emphasise that I have only listed a few solutions to highlight hundreds of other logical approaches to SIMPLE problems.
