

There IS a Price to Pay!

by lou Sunday, Jan 19 2014, 11:16pm

international / prose / post

Have you ever considered how thoroughly inept western democratic governments are today compared with pre and post WWII governments? Of course there is a reason for these abysmal failures today; I would cite the Oz experience, Hawke, Keating, Howard, Rudd, Gillard and Abbott, as clear examples but as we are all aware the situation is far worse in the USA, UK and most Western European nations.

The reason is simple and obvious, it stems directly from unrepresentative puppet government and the talentless narcissist types that vie for political leadership BUT serve with absolute compliance, the plutocratic powers. Watching would-be leaders suck up to figures like Murdoch and other billionaires is enough to make you draw your pistol -- I speak as a former military man that has sworn allegiance to the nation and people not to the treasonous scum that serve minority, unrepresentative, proven criminal, ruling elites.

However, the unrepresentative swill in government are acutely aware they live because we allow it, a simple contrary decision would end any one of their traitorous lives. This unrepresentative treasonous scum is well aware they walk a very fine line indeed; they are aware they are totally expendable and it is their masters who would have them eliminated before any independent assassin, but ya never know your 'luck' in a big city, do ya, scumbags?

Imagine the pressure Obama and other treasonous political scumbags endure parading as the expendable fall guys for the shadowy real ruling elites. Puppet leaders that have sold their souls to the devil have no choice but to serve the evil elites which wouldn't hesitate to remove them from the planet if threatened. However, today they also face bullets from highly trained and skilled veteran snipers that are masters of stealth and are easily capable of taking out any puppet politician anytime they choose. Discharging a single, precisely targeted, lethal round and disappearing into the landscape/crowd or underground is routine for military trained snipers. So watch your traitorous arses, gentlemen/women, our patience is wearing thinner than a Tally-Ho!

Today, EVERYONE must face the price and consequences of their actions; puppet politicians, the assassins bullet; the masses, oppression and slave conditions by allowing corporate controlled UNREPRESENTATIVE scum to assume political office and then contemptuously shit in the people's faces -- 'there will be no GST or Carbon Tax' -- ha, ha, har!

As the planet careers into corporate created, **IRREVERSIBLE CLIMATE CATASTROPHE**, political leaders should take great care, as the future augurs very badly for those that have sold our planet and future viability for short term gains and transient status.

On the constructive side, we are heartened to hear that Coca-Cola-Cascade Australia has today announced that it will support local fruit growers and local food viability rather than source cheaper produce in China, South Africa or Eastern Europe, which the non-Australian, SUBVERSIVE CEO of Wesfarmers Coles has done. Mr Ian McLeod is personally responsible for destroying the viability of a 60 year old fruit growing tradition and cannery businesses and thousands of local JOBS simply because this hit-run CEO pig, chased a personal bonus at ANY COST! This detestable scumbag

received a pay cheque of \$10 million last financial year. A pay cheque of this size is grotesque considering the PRICE in food sovereignty and local jobs Australia paid; so, Mr Ian McLeod, serving your personal interests to the great cost of Australia may prove to be the most costly folly of your miserable selfish life, never imagine that our politicians reflect true Australian character -- without exception they are all spineless, traitorous, custard faced, knee-walking vermin!

We have more news for treasonous politicians and corporates that undermine the nation and people -- are you reading this, ABBOTT, you chicken shit? I have never seen dead men spend their ill-gotten gains, but perhaps a few of you can show us all how it's done!
