### Are you reading this America?

When a State repudiates the founding principles upon which it was built and flagrantly abuses local and international law it is clear that a coup has taken place -- it is immaterial whether the coup occurred by stealth or by gun. When a nation allows itself to be ruled by criminals the outcome is sure. MOB RULE! Populations learn fast, what is good for the leaders of a nation is good for its people!

It's only the time factor that is uncertain, the entire world, including the U.S. population, is now aware that the USA is a resource thieving, expansionist, assassinating, gangster nation run by a mass murdering, Zionist criminal, Banker elite.

There are so many reasons why a criminal State and fledgling empire must FAIL, I hardly need reiterate what is adequately covered in thousands of history texts.

All empires become intoxicated with their own power and always overreach their capability, as the U.S. has already done. FAILURE is assured, as highly mobile forces converge to destroy a common enemy that once wreaked havoc and social destruction on a peaceful world.

The writing is etched on the walls of bullion vaults emptied by the greed of criminal Zionist banker elites. Return the gold that nations entrusted to your safekeeping AMERICA, it would certainly delay the inevitable!

The linked article below, written in 2010, is most revealing:
