

A debt-enslaved, alienated, terrorised society

by smiley Sunday, Feb 2 2014, 9:35pm

international / prose / post

‘And it’s come to this,’ are the famous mythic words that Oz bush ranger and revolutionary, Ned Kelly, uttered when he was sentenced to death for attempting to survive as a free man in penal colony Australia.

Not a lot has changed since Kelly fought corrupt, exploitative, mercantile powers or the Wall Street of his day except that elite controlled financial criminality is now a GLOBAL enterprise.

Today the means of slavery is debt, not whips, chains or the hangman’s noose, simple but highly effective money bondage imposed by those that print (unpegged) toilet-paper money from thin air.

It becomes clear after some preliminary research that the privately owned Central Reserve Banking System is the largest most successful criminal enterprise in all history -- but not for much longer as the public is becoming aware of the outrageous scam.

But I would rather focus on solutions and remedies as an abundance of information on the means and effects of modern slavery and psychological bondage is available in the public domain.

The title overtly addresses the main issues preventing societies from becoming a unified force for justice, freedom, liberty and fair play. Social compliance is induced by design, the masses are subject to the pressure of debt and the prospect of losing ones ability to service ‘contrived’ debts -- contrived simply because costs have far exceeded average real wages or the ability of the average person to adequately cover basic living requirements and the debts that modern life imposes on them.

An expression in my youth rings true today though few would have imagined, in the context of the times, that such a ‘reality’ would ever materialise. We used to joke as youths that ‘so & so’ developed such a sophisticated ‘rort’ -- questionable money making venture -- that he had a “license to print money!” But that is precisely the reality today, private individuals print worthless paper money on demand whenever it suits them but impose real debt BURDENS on citizens to service imposed debt created by fake or worthless money! What a fuckin’ rort, no-one would have imagined that any clique, milieux or gang of thieves could ever getaway with a scam of that nature BUT that is the cruel reality TODAY, a few families control the finances of the WORLD and maintain their control via their money-printing privately owned Global Reserve Banking System -- give fair play, freedom and justice a break, please!

There are no special or ‘divine’ attributes these criminals possess that give them licence to lord over humanity in this way; why this parasitic vermin should be allowed to continue DUPING humanity with this outrageous CON is anyone’s guess but it continues as I write though it is under considerable threat.

Here’s ONE (of many) simple but effective solutions to free nations and societies from the parasitic scum that have duped humanity into slavery. Establish publicly owned national or State Banks similar to the Common-Wealth Bank of Australia PRIOR to a thoroughly corrupt politician privatising

a people's bank and surrendering the nation's currency to the rogues on Wall St. -- such treason is beyond the pale but no-one said 'boo' at the time, due mainly to the efforts of co-conspirators, the privately owned MASS MEDIA, to sustain the existing oligarchy and status quo. Whereas by simply spelling out how the treasonous actions of former PM Paul Keating, would annihilate Oz Sovereignty, future independence and make Australia an easily exploited slave nation, may have altered history!

BUT it's NEVER TOO LATE to RIGHT a WRONG! Simply reject unrepresentative politicians serving the interests of an elite oligarchy or plutocracy -- as PM Tony Abbot is brazenly doing today in Oz -- and DEMAND, under threat of LEGAL REMEDIAL DIRECT A-C-T-I-O-N, that nations take back the control of their monetary systems. AND NEVER FORGET that a nation's wealth belongs to the people of the nation, not an elite group of criminal parasites or TAX EVADING corporations.

As is clearly evident, effective solutions are many and simple but I am not able to imbue populations with courage or the nous required to act as one overwhelming majority to achieve JUSTICE and fair play for ALL -- the criminals that have enslaved you are an incredibly small minority!

Publicly owned National/State Banks that create money/currency/WEALTH for the nation, not private individuals, and nooses for mass murdering, enslaving criminal parasites, F*..K YEA!
